2021 Region	91.85	96.45	Due to the impact of the COVID pandemic, the required testing for 2020 was waived by the state.			56.04	21.54	38.71	11.29

Perkins V Secondary CTE Participation and Concentrators

A secondary CTE concentrator is defined in Perkins V as a student served by an eligible recipient who completes at least two courses in a single CTE program or program of study. In contrast, a secondary CTE participant is defined as a student who completes not fewer than one course in a CTE program or program of study of an eligible recipient. The CTE courses must be assigned by the EFE in the Illinois State Course System to qualify.

Background

States were required to develop a new Perkins State Plan as part of the Strengthening Career and Technical Education for the 21st Century Act (Perkins V) legislation, which became effective July 1, 2019. Illinois' Perkins V State Plan was developed in consultation with stakeholders from around the state, who provided feedback on all aspects of the plan, including the proposed State-Determined Level of Performance.
